Flowchart: University Procedures for Eradicating Bedbugs

1. Student suspects bedbug infestation
2. Student informs Housing; Housing contacts Facilities
3. Facilities verifies the infestation
4. Facilities coordinates a temporary room assignment and provides specific instructions for affected student(s)
5. Affected student(s) vacate the room, following specific instructions
6. Facilities brings in a pest control company to treat the infested room
7. Pest control company heat-treats the room, raising the temperature of the room and its contents to more than 130° for a period of 4–6 hours
8. Facilities washes and dries bed linen, and tidies and vacuums the room
9. Facilities gives the OK and student(s) move back into the room
